WHY MAINTAINING YOUR HOME SYSTEMS MATTERS

Your comfort, safety, and savings depend on it.

At Strickland Plumbing, HVAC & Electric, we believe a well-maintained home is a safe, efficient, and healthy home. Here's why routine maintenance on your systems matters — and how it helps you.

HVAC (Heating & Cooling)

- Improves energy efficiency – Dirty coils and clogged filters force your system to work harder, costing you more in energy bills.
- Extends system life – Regular tune-ups reduce wear and tear.
- Prevents breakdowns – Most emergency HVAC calls stem from issues that could've been caught early.
- Keeps your home comfortable – Reliable performance all year long.

 **Recommended: HVAC MAINTENANCE BI-ANNUALLY ANY COMFORT PLAN**

Plumbing

- Prevents leaks and water damage – Small leaks can turn into costly repairs.
- Protects water heaters – Sediment buildup affects performance and lifespan.
- Maintains water pressure and safety – Ensures valves and connections stay in working order.

 **Recommended: PREMIUM OR ELITE COMFORT**

Electrical

- Ensures safety – Prevents overloaded circuits, faulty breakers, and fire hazards.
- Protects your electronics – Identifies surge risks and outdated wiring.
- Brings peace of mind – Know your home's electrical system is secure and up to code.

 **Recommended: ELITE COMFORT**

Aerobic Septic System

- Protects your property – Prevents system overflows and ground contamination.
- Avoids costly repairs – Catching aerator or pump failures early saves thousands.
- Maintains proper treatment – Ensures waste is broken down and filtered safely.

 **Recommended: COMFORT ADVANTAGE AND PLUS**

Water Quality Testing

- Reveals hidden contaminants – Hardness, chlorine, iron, and even bacteria can affect your plumbing and health.
- Improves taste and safety – Clean, healthy water for drinking, bathing, and cooking.
- Protects appliances – Reduces scaling and corrosion in pipes and fixtures.

 **Recommended: WATER QUALITY TEST - ANNUALLY**

Indoor Air Quality (IAQ)

- Reduces allergens and dust – Cleaner air = fewer respiratory issues.
- Identifies mold or humidity issues – Helps prevent property and health damage.
- Improves comfort and breathing – Especially important for asthma and allergy sufferers.

 **Recommended: IAQ Test**

Stay Ahead of Repairs

Preventative maintenance helps you:

- Save money
- Avoid inconvenient breakdowns
- Keep your family safe and comfortable
